

Math 81 Videos Available through "Brightstorm.com"

Free videos can be viewed through brightstorm.com, click on Math, then Algebra 2

Each topic has a "concept" video and then several problem videos, be sure to watch the problem videos; they will probably be the most helpful. Unfortunately there may be a short advertisement (30 seconds) before some of the videos. Otherwise the videos are great. A typical video is about 2-3 minutes.

Some videos I think are helpful to review (because they are newer topics) for the final are...

Inverse, Exponential and Logarithmic Functions

Finding-an-inverse-algebraically

Solving exponential equations with the same base

Solving simple Logarithmic equations

Solving exponential equations with different bases

Solving a logarithmic equation

Systems of Linear Equations

Solving a system of linear equations in two variables

Solving a linear system in three variables with a solution

Roots and Radicals

Rational exponents

Solving equations with radicals

Any of the complex number videos

Linear Equations

Applied Linear equations: Mixture problems

Applied Linear equations: Investment problems

Applied Linear equations: Distance problem

Rational Expressions and Functions

Simplifying complex fraction

Solving a rational equation
