

Login to our Course Management System, Blackboard 9.1: <http://rscdd.blackboard.com> with your WebAdvisor userid and password. This is the same account that was used to register for your courses online.

If you are having difficulty with your login please try the following before you request your password to be reset.

- Carefully reenter your userid and password and remember the login is case sensitive. Allow time for the browser to access your Bb account.
- Do not quickly reenter your password as repetitive login attempts will cause a “time out” for 15-20 minutes before you can try to login again.
- If you have forgotten your userid or password, click on the link at our Blackboard site to obtain your login information. It will take you to the WebAdvisor screen (<http://sis.rscdd.edu>).
- If you requested to have your password reset you will be emailed a temporary password. Login to your WebAdvisor account (<http://sis.rscdd.edu>) and enter your userid and the temporary password. You will then be prompted to change your password after you first log in.

After you have updated your WebAdvisor account you will now be able to login to your Blackboard account using the same userid and the new password.
