The Value of Software Certifications

91% of hiring managers consider software certifications as
criterion for hiring.

MOS and ACP provides industry-leading assessments of
hands-on technical skills and knowledge to complete real-
world business project tasks.

Certifications guarantee that every certified user has
demonstrated the ability to use the full features and
functionality of the software app for the workplace.

The value of certifications provides workforce candidates the
competitive edge to validate technical skills for employment
and to build a successful career.

Earn Industry Certificates with LinkedIn Badges in all BA Microsoft & Adobe classes

MOS and ACP Certifications are industry-recognized credentials that validate proficiency in technical skills using software applications.

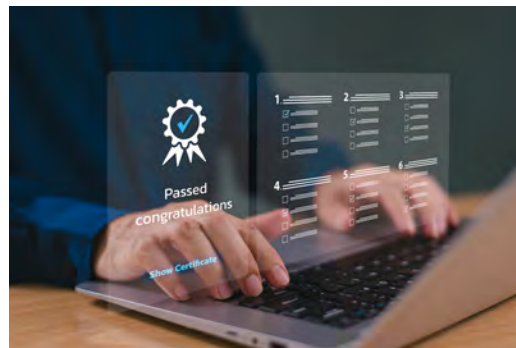

All BA Adobe courses include online practice tests and proctored exams for free. Each 50-minute exam has approximately 30-35 questions and/or project-based tasks. You only need 70% to pass!

Learn technical skills for a job and earn certifications for your resumé at the same time!

What sounds better in an interview or on a resumé . . .

“I am self-taught”
OR
“I am professionally trained
and software certified!”
