Activities:

As part of the maintenance for the fire alarm system, Cosco Fire Protection will be on-site to replace the fire alarm panel in building A. The panel is located on the 1st floor in the electrical room. Replacing the panel will require the power to be turned off to the panel. This will only affect the power going to the panel. Once the panel has been replaced, Cosco will perform a test which will sound the bells and horns. There will be an announcement prior to the test.

Cosco will begin work at 8 am and be completed no later than 2 pm.
