The district is estimating over 30 months for the project in its entirety.</li> <li>• A more definitive duration of time for the project will be known before summer.</li> </ul> <p>A concern was noted regarding delays in project timelines.</p> <ul style="list-style-type: none"> <li>• It was noted that under the new contracts and planning process, a set amount of delay time is built into the contract and schedule.</li> <li>• Caution is also taken not to overinflate the delay time in the contracts as that could inflate costs.</li> <li>• Specifically, in the case of the Central Plant project, the district has studied the current infrastructure in anticipation of any issues that could arise.</li> <li>• Important to understand that although construction could be a very short timeline, the tolerance level in regards to delays has to be flexible.</li> <li>• Members were reminded that the campus is a very dynamic environment to build upon correctly. The unforeseen conditions makes it difficult.</li> </ul> <p>Members were advised that currently under review is the possibility of removing the M building from the Central Plant Infrastructure project and connecting it at later date.</p> <ul style="list-style-type: none"> <li>• Moving forward as originally planned would mean that the recent work in the building would have to be torn into and occupants would be disrupted.</li> </ul> <p><b>Johnson Student Center</b> A budget refresh will be completed once the programming phase is completed.</p> <ul style="list-style-type: none"> <li>• It was confirmed that the original 28.9mil budget is under review.</li> <li>• An overview of the budget development process for the project was provided to the committee.</li> </ul> <p>It was requested that once the programming is validated for the Johnson Center project and the STEM building a high level review be provided to the membership.</p> <p><b><u>Parking Lot at 17<sup>th</sup>/Bristol</u></b> Members were reminded that the lot is being used for construction traffic as opposed to parking on campus. This option lowers the impact on campus parking.</p>	<p><b>FOLLOW UP</b> Facilities Planning will bring a high level review to the SAC Facilities Committee for both the Johnson Student Center and STEM project as the programming is validated for each building.</p>
